Dassault Systèmes and Outscale Announce ISO Security Certification for Outscale Cloud

Recognized ISO/IEC 27001:2013 Full Compliance Advances the Industrialization of the Cloud to Meet Industry Needs

VELIZY-VILLACOUBLAY, France — **October 16, 2014** — Dassault Systèmes (Euronext Paris: #13065, DSY.PA), the 3DEXPERIENCE Company, world leader in 3D design software, 3D Digital Mock Up and Product Lifecycle Management (PLM) solutions, and Outscale, a global leader in cloud services, today announced that Outscale cloud received ISO/IEC 27001:2013 security certification from BSI Group. This certification – recognition for information security management systems compliance – enables Outscale to offer a unique, fully operational and secure cloud platform that meets the highest global industry requirements.

Outscale's optimized cloud architecture, unlike other cloud platforms, goes beyond simple data storage and computation. It was designed for the industry with customizable features. As part of its cloud portfolio, Outscale's critical, high performance interactive applications encompass simulation, visualization of complex elements and data management while, in parallel, ensuring data security and traceability throughout the entire process, from initial data entry through to storage and transmission. The full platform also addresses security and regulatory parameters specific to local industrial processes.

"The internet, by nature, is international—a virtual environment without borders. While the cloud echoes this virtual environment, from certain industry perspectives, security, local laws and regulations must be respected during the industrial development process, and current cloud infrastructures don't address this issue," said Laurent Seror, founder and president of Outscale. "Our cloud platform takes the mystery out of security issues linked to regulations through tailored, secure architecture that is built in accordance with local laws."

Dassault Systèmes, an initial investor in the company, relies on Outscale services to manage its on-the-cloud portfolio of solutions. With Outscale, Dassault Systèmes dedicates a highly specialized world class structure to ensure 24x7 service, and leverages dynamic cloud resources allocation to provide best availability of its 3DEXPERIENCE platform, globally.

"Since the inception of Outscale, founded by a leader of Dassault Systèmes, the two companies have shared the same vision: a cloud project that provides an efficient and one-of-a-kind structure to address end-to-end security and high performance for interactive 3D applications, and vast volumes of semantic-rich data," explained Bernard Charlès, president and CEO, Dassault Systèmes. "Outscale represents a new generation of cloud for industry looking for comprehensive, secured and structured cooperation hubs, such as the one we have developed for the European aerospace industry."

Outscale was founded in France in 2010 and developed by research and development engineers according to a global-local formula: an entrepreneurial mindset targeting an international customer base that must adhere to local laws and regulatory barriers. With over 800 customers and facilities in France and the USA, Outscale is planning to expand its operations internationally in order to reinforce its global presence.

About Outscale
Founded in 2010 and backed by Dassault Systèmes, Outscale delivers the highest performance and quality standards in cloud services to companies. Outscale is present in the leading data centers in Europe, in the USA and in Asia and operates client computer resources across the globe. For more information, visit: www.outscale.com.

About Dassault Systèmes
Dassault Systèmes, the 3DEXPERIENCE Company, provides business and people with virtual universes to imagine sustainable innovations. Its world-leading solutions transform the way products are designed, produced, and supported. Dassault Systèmes' collaborative solutions foster social innovation, expanding possibilities for the virtual world to improve the real world. The group brings value to over 190,000 customers of all sizes, in all industries, in more than 140 countries. For more information, visit www.3ds.com.

CATIA, SOLIDWORKS, ENOVIA, DELMIA, SIMULIA, GEOVIA, EXALEAD, 3D VIA, 3DSWYM, BIOVIA, NETVIBES are registered trademarks of Dassault Systèmes or its subsidiaries in the US and/or other countries.
