CAPITAL MARKETS DAY

JUNE 14-15, 2018 | PARIS CAMPUS, FRANCE

Olivier SAPPIN

Vice President, Transportation & Mobility

CAPITAL MARKETS DAY

JUNE 14-15, 2018 | PARIS CAMPUS, FRANCE

3DEXPERIENCE Value | Transportation & Mobility: Electric Vehicles

FT FUTURE OF THE CAR SUMMIT 2018

What are Transportation & Mobility executives saying about the future of their industry?

FT FUTURE OF THE CAR SUMMIT 2018

London | 15 - 16 May 2018

"Autonomous Car has to be simulated with billion of cases in computer ..."

Håkan Samuelsson, President & CEO, Volvo Car Group "Car will no longer be a car: the car will be a **robot**, a **data centre**, a **service**, a **digital companion**"

Padmasree Warrior.

NIO US CEO cofounder & pr

"Depending on where you are in the world, the technical solution for autonomous driving will be different,"

Karl lagnemma, cofounder & president of nuTonomy

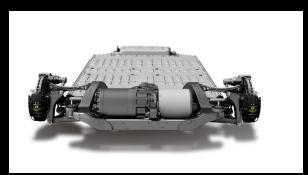

Major impacts on Transportation & Mobility sector:

- Increasing numbers of New companies & New innovations in the domain of Transportation & Mobility
- Major impact on existing Vehicle Architecture & technologies

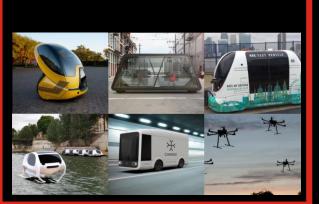

3. A **new approach** is required to develop **Mobility system** such as Autonomous Driving

Increasing numbers of New companies & New innovations in the domain of Transportation & Mobility

 Major impact on existing Vehicle Architecture & technologies

 A new approach is required to develop Mobility system such as Autonomous Driving

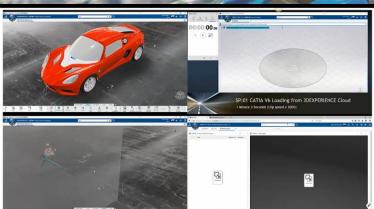

- Starting from scratch in 2016
- •Complete Engineering team up and running with 3DEXPERIENCE platform
 - Global: 3 Geos
 - Online : double digit performance improvement
 - End to End Engineering Coverage

- 3DEXPERIENCE Cloud selected to provide a global, secured and unified platform
- 2 weeks for 10 users to get acquainted with 3DEXPERIENCE
- better performance, data more secured, easy collaboration, data accessible from anywhere

Emblematic EV Startups are **adopting 3DEXPERIENCE** platform

100+ Startups created in **4** years

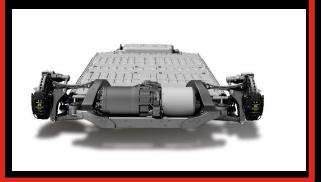

Increasing numbers of New companies & New innovations in the domain of Transportation & Mobility

 Major impact on existing Vehicle Architecture & technologies

3. A **new approach** is required to develop **Mobility system** such as Autonomous Driving

VEHICLE ELECTRIFICATION | NEW TECHNOLOGICAL CHALLENGES

New systems represents new technological challenges

Battery

- Maintain temperature gradients < 2°
- Predict aging to keep low warranty costs
- New safety requirements

Electric Drive

- Thermal requirements (20k+ rpm, 800V)
- Electric ripples
- Packaging
- Manufacturability

Power Electronics

- DC/DC Dual tension in vehicle (high voltage + 12V)
- Mechanical and thermal stress
- Power and Signal Integrity: Electrical ripples

HVAC

- Optimize energy required to preserve battery charge
- Optimize entire vehicle thermal behavior

Chassis

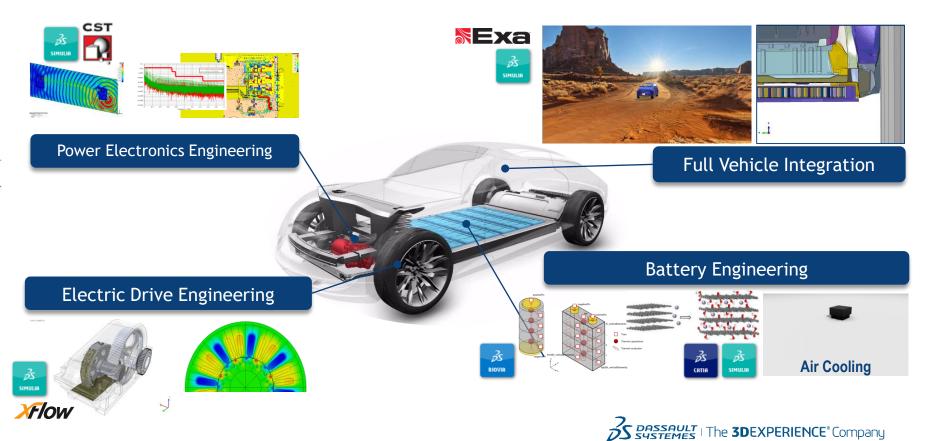

- New vehicle dynamics due to low center of gravity
- High modularization opportunities (battery modules, motors by axle or at wheels)

Vehicle Architecture / Body

- · Minimize weight
- New configuration and packaging opportunities

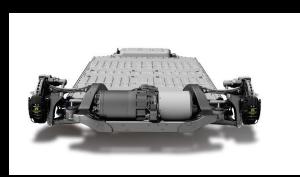

3DS is investing in key technologies for Vehicle Electrification

Increasing numbers of New companies & New innovations in the domain of Transportation & Mobility

 Major impact on existing Vehicle Architecture & technologies

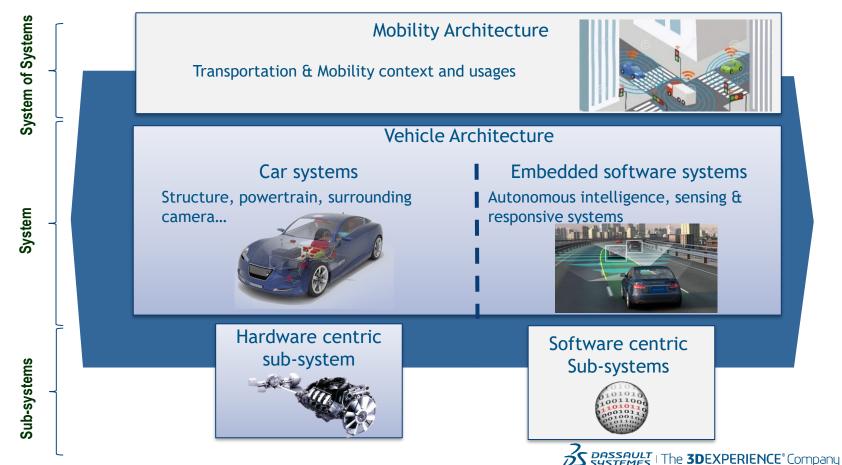

3. A **new approach** is required to develop **Mobility system** such as Autonomous Driving

Transportation & Mobility System Architecture

Imagine, Test & Deliver new Mobility Experiences

Vehicle Electrification

>> Improve electric car performances from material modeling to battery to vehicle

Driving Automation

>> Deliver safe driving experience by connecting software & hardware disciplines

Connected & Shared Mobility

>> Learn from product usage data to continuously improve products & services

SPASSAULT | The 3DEXPERIENCE Company

Dassault Systèmes provides business & people with 3DEXPERIENCE universes to imagine sustainable innovations capable of harmonizing product, nature and life.
